LABOUR REVIEW

Alberta Summary for Period Ending 1st November, 1953

(Source: Labour Gazette, Volume 53, No. 11, November, 1953)

Seasonal activity in the Prairie region decreased sharply in the month of October. The down turn was confined primarily to agriculture and was partially off-set by an increase in other activities. Non-agricultural activity continued at a high level, the year to year rate of increased employment exceeding that of other regions. Much of the increase is accounted for by new Industries in Alberta where many plants are now almost completed. Owing to the unusually fine weather the harvesting of more than 600,000,000 bushels of wheat on the Prairies was completed by the middle of October. The disposal of this near record crop is now one of the more pressing problems. The early completion of the harvest eliminated existing labour shortages on the Prairies but no local surpluses had developed by November 1st. As of November 1st, 1952, four areas still had labour shortages.

Employment in Edmonton, Calgary and Winnipeg was higher than last year by 8%, 4% and 3% respectively. During the month the labour supply in Edmonton increased sufficiently to eliminate shortages but activity remained at the highest level of any area in the region.

Changes during the month included the movement of Red Deer from the shortage of labour to the balanced category although the demand for labour eased substantially. The amount of construction work to be done before the winter prevented the accumulation of labour surpluses in any area. Because of the slow movement of grain there was a noticeable reduction in retail trade in many areas, particularly among farm implemtnt dealers.

Employment and Payrolls

The Dominion Bureau of Statistics collects monthly data from firms, usually having 15 or more employees. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are not included. Employees engaged in agriculture, government, and educational services are excluded. Wages represent gross earnings before deductions for unemployment insurance, taxes, pension funds, etc. are made. They also include the cost-of-living bonus, made at frequent intervals. They exclude value of board and lodging, employers' contributions to unemployment insurance, workmen's compensation and pension and welfare funds as well as bonuses paid at irregular or infrequent intervals such as annual bonuses and retirement gratuities. The following tables compare the employment and wage situations as at 1st of October, 1953, with that existing one year earlier in the main non-agricultural industries of the province of Alberta. Figures for the cities of Calgary and Edmonton are shown as well.
